

Sixth GUM-Workshop „Nachwuchsförderung“ („young scientist development“)

Hereby, we would like to invite all young scientists to our annual GUM-workshop “Nachwuchsförderung” (“young scientist development”). The workshop is open for both members as well as interested non-members of GUM.

The sixth GUM-Workshop “Nachwuchsförderung“ will be held in Basel on 1st Sep 2019.

If you are a student (BSc, MSc, PhD) or young postdoc, this GUM-Workshop offers the possibility of presenting your research in English language to a mixed audience comprised of representatives from industry and authorities as well as university.

The best presentation will be awarded. The award committee consists of the present board-members of GUM, representatives from industry and the young scientist development group of GUM. To improve your presenting skills even further, every speaker will receive extensive feedback by the jury.

Furthermore, local research groups in close relation to GUM will briefly present their main research interests.

If you wish to register for this workshop or submit an abstract for presentation, please send an email to Tanja.Schwerdtle@uni-potsdam.de. Participation is free of charge. To better determine your current career-status, please include a comprehensive tabular CV in your abstract-submission. For participation only, you do not need to submit any abstract.

Format for abstracts: Arial 12pt, justified, line spacing 16pt (precisely), maximum of 2500 characters.

Deadline for registry and abstract submission: 15th July 2019

If you have any further questions or queries please direct them to:
